

**Mirrors Heads and Brackets**  
Huge range to suit many applications

## Mirror Heads and Brackets

The Britax mirror range is the number one commercial mirror brand in Australia

The Britax mirror range covers a massive cross-section of applications from light commercial and utility vehicles to road freight, agricultural and construction vehicles.

The Britax mirror range offers an extensive variety of fitments with adjustable brackets plus a range of stick-on or bolt mount spotter mirrors.

### The Britax mirror range features application flexibility

Even though the Britax mirror range is divided out by most common application, almost all of the mirror heads can be adapted to suit most applications.

For example, if a West Coast type truck operator likes the look and functionality of a European or Japanese style mirror head, the Britax range includes brackets and adaptors to assist with a smooth transition.

The Agriculture and general purpose range is the most flexible, with some of the smaller tractor mirror heads also being suitable for many Utility applications or used as additional spotter mirrors on large European trucks.

There are no hard and fast rules as to which mirror you should use. In some cases, it all comes down to which features, and look, will best suit your application.

### Britax convex mirrors explained

Britax convex mirrors are curved to different degrees using a radius number—the sharper the curve, the wider the angle of vision:

e.g. a 300mm height R1200 mirror appears only slightly curved as it's a section of a larger theoretical circle

R = Radius (spherical)  
e.g. R400 = a 400mm radius

R1800 is the least curved mirror (bigger number, less curve)  
R400 is the most curved mirror (smaller number, more curve)

This conforms to the EEC Directive 88/321 and ECE Regulation 46.01

### Britax mirror range OEM fitments

Britax PMG Ltd (Bridlington, UK) is proud to have a long-standing relationship with some of the worlds leading blue chip equipment manufacturers including; AGCO (Massey Ferguson), Case New Holland (CNH), Caterpillar, JCB, John Deere, Komatsu and Volvo.

Here in Australia Britax Automotive Equipment (BAE) have worked closely with leading manufacturers, including Mitsubishi Fuso, to develop custom solutions to suit the local harsh Australian conditions. [www.eccosafetygroup.com.au](http://www.eccosafetygroup.com.au)
